#### **Assignment and Activity Descriptions**

**Programming assignments**: The purpose of the programming assignments is to give you individual practice on the topics that you are learning and to explore some ideas more deeply. Assignments will be given frequently for you to complete. The following guidelines are to be observed concerning the programming assignments (labs):

- No late assignment will be accepted. No e-mail submission is accepted. There
  are no exceptions to this rule.
- All assignments, unless otherwise specified, must be submitted to Blackboard and contain your name, course discipline and number, and the title of the assignment.
- Assignments are not weighted equally. Each assignment has a designated value.
   The value of each assignment can be found on the first page of the document describing the assignment.
- Labs are due by the end of the day on the designated due date.
- The labs will be developed on the department's Unix environment.
- Assignments will be graded on the CS department's Unix environment. If you
  develop solutions to the programming assignments in a different environment
  such as Microsoft Visual Studio, it is your responsibility to ensure that these
  solutions work correctly in the Unix environment also.
- You are responsible for doing your own work. You may be asked to
  defend/explain your work at any time. You are encouraged to work with your
  classmates and use the resources of the Internet to understand and complete the
  assignments; however, when you submit an assignment, you are verifying that it
  is your own work. Cheating will not be tolerated.

**Exams**: Five exams will be given throughout the semester (including the final). The following guidelines are to be observed concerning the exams:

- There are no makeup exams. Only exception will be student absence for observance of religious holy day (see Additional Policies below).
- If an exam is missed, a grade of zero will be given for that exam.
- The final exam must be taken on its assigned date.
